Laboratory medicine is critical for maximizing health outcomes.

Measuring the value of laboratory medicine, however, in the form of key performance indicators has been a challenge for many. This workshop will facilitate roadmaps and pathways for measurably better healthcare through integrated clinical care initiatives including best practices for the development and measurement of key performance indicators. This program includes partners, judges, advocates and winners of the UNIVANTS of Healthcare Excellence awards, a global healthcare program with maximize prestige that recognizes for cross-disciplinary healthcare teams who have quantified the value of novel thinking, new processes and the benefits of teamwork fueled by insights derived from laboratory medicine. Join us for this interactive hands-on workshop.

Learning Objectives:

at the end of this workshop, participants should be able to:

1. Understand unique and diverse opportunities to empower and activate insights from laboratory medicine into measurably better healthcare best practices
2. Galvanize cross-disciplinary teams to achieve improved outcomes through key performance indicators for patients, payors, clinicians and health systems
3. Develop roadmaps for measurably better care and outcomes including enhanced visibility of laboratory medicine as well as global recognition for healthcare excellence.
